- *Density:* thick and lush

Control area

- *Height:* 10- 15 cm
- *Density:* Thin and dry

Stock Feed. Geelong District, Victoria

Combination Spray of Herbagreen and Vitaflora. September 2011

Farmer's feedback:

The farmer was very impressed with the density of the growth, height and health of the stock feed. Moreover, he was amazed with the health and depth of the root growth which is showing good soil structure and ample microbial activity to ensure that the soil remains healthy for the coming year.
